INTERNATIONAL WEEK MOLECULAR GENE TECHNOLOGY

MONDAY 14TH – FRIDAY 18TH MARCH 2022

Target audience: Students of Agricultural Engineering, Agro-Industries, Biotechnology Chemistry, Biochemistry, Applied Engineering

The field of Molecular Gene Technology has multidisciplinary applications with significant roles in improving life. Our international week offers international students the opportunity to learn about different applications of Molecular Gene Technology, addressing topics related to gene technology in food production, plant and protein engineering and animal research.

Registration fee:
95 €

(this amount may be subject of reduction)
(accomodation not included)

Deadline registation: 15 of January 2022
